ImagineIF Libraries Launches 3d Printing Pilot Program

Kalispell, MT - ImagineIF Libraries is excited to launch a Free Public 3D Printing Pilot Program in January 2024. The program's objective is to foster creativity, skill development, and innovation within the community. By providing free access to 3D printing services for personal and educational purposes, ImagineIF aims to empower individuals of all ages and backgrounds to explore and utilize this technology.

To use ImagineIF's 3D printer, patrons can submit a 3D printing request using an online form on the ImagineIF Libraries website at imagineiflibraries.org/services/3d-printing/. Patrons will need to provide a link to a 3D file under Creative Commons licenses from reputable websites and agree to the program's terms and conditions when they submit their request. The user-friendly process ensures accessibility to this exciting technology.

Upon completion of the 3D prints, patrons can pick up their creations at any ImagineIF location. To enhance the program's success and gather valuable insights, patrons are required to complete a brief survey. This feedback allows ImagineIF to continuously improve the program and tailor their services to the needs and expectations of the community.

The Free Public 3D Printing Pilot Program will be in full swing from January 2024 to May 2024, offering an exciting window for our community to immerse themselves in the world of 3D printing. This initiative is not just about technology; it's about community collaboration, education, and the collective exploration of what's possible.

ImagineIF Libraries invites everyone, from tech enthusiasts to those curious about the possibilities of 3D printing, to join in on this exciting journey. By participating in the Free Public 3D Printing Pilot Program, you are not only gaining access to this technology, but actively contributing to the shaping of our community's future.

ImagineIF Libraries provides educational and recreational materials, programs, and resources to promote literacy, inspire lifelong learning, and enrich the community. For more information, visit imagineiflibraries.org.
